FOUND IT! BARN DOOR TRACKING

3 Comments 22 NOVEMBER 2010

By Jodi Murphy

I can't tell you how many images of I have in my dream file of doors on barn-like tracking. I am drawn to the "exposed hardware" industrial feel, and the space-saving functionality...but I've always had difficulties figuring out where to find the track, so the solution remains just a dream. I can't begin to share how happy I am to have discovered **KNCrowder**, a family-owned and operated Canadian Company and their **Crowder Round Track (CRT)**!

Congrats on your find! I too share your love affair of barn doors! Where did you find the door you are going to use? I have been struggling to find just the perfect barn door.
