

Throw a **curve** into your office! Spice it up!

new

KN Crowder, a leader in the sliding door track industry, introduces their new curved track system.

THE NEW CURVED door track system departs from the traditional 'boxy' office look and enables interesting spaces to be created using curved walls and doors. It is ideal for all pocket door applications. Concealed doors create a more spacious looking environment.

Sliding doors, whether curved or straight, save tremendous amounts of floor space compared to hinged doors. Curved tracks can be top mounted and Side-Mount brackets are available for wall-mounted applications. Almost all tracks and guide channels can be curved to meet the exact specified dimensions. With a 24" [610mm] minimum, any radius can be accommodated in any arc length. The curved sliding door track system is quiet and durable and ensures that the door's glide is extremely smooth.

KN Crowder is committed to innovation. We provide the sliding door industry with quality engineered, durable and time-tested hardware through our Crowdertrack line of sliding door products. Crowdertrack is as 'smooth as flight'.
