## C-538

## Installation Instructions

- Top mount hanger with $1 / 2$ in [12.7 mm] adjustment range
- Precision ground ball bearings with nylon wheels
- Cycle tested up to 150,000 times

## Parts' List

- Top mount double (bypass) track
- For $13 / 8$ in [ 34.9 mm ] doors
- For up to $125 \mathrm{lbs}[57 \mathrm{~kg}$ ] doors
- Optional snap-on fascia (C-519)

## C-538 Top Mount Double (Bypass) Track $x$ length (1)

Length $=2 \mathrm{x}$ door width, example: 36 in [ 914 mm ] door $=72$ in [1829 mm] track
\#10 x 1-1/4" Pan
Head Screw (16)
[FT4]

C-400 Hanger Body (4) c/w wheels and stud

16-18 K-Lock Nut (4)
[FT17]

Complete C-538-W kit illustrated. Cut-outs in track to expose components.

## Optional Add-on Products

C-519 Snap-on Fascia $x$ length (1)
Length = same as track length, example:
72 in [1829 mm] track $=72$ in [1829 mm] fascia

[FT2]

## Installation Steps

## Step \#1:

Determine door size, header height, track position and bottom clearance based on the kit code ordered by using dimensions shown in detail views on previous page.

## Step \#2:

Note: If access to the ends of track is not available, step \#3 must be completed before step \#2.
Cut C-538 aluminum track to size if required, typically $2 x$ the door width. Locate and pre-drill $\varnothing 3 / 16$ in holes through center of track. Secure track to structural support/header with \#8 x 3/4" Pan Head Screws [FT2], quantity of 16 are supplied.

Note: Solid support is required and spacing is recommended to be between 12-16 in [300-400 mm] on center. Consult structural engineer to ensure adequate support and fastening.

## Step \#3:

Slide four (4) C-400 Hanger Bodies with wheels into track as shown right.
Note: Ensure "kncrowder.com" text on hanger bodies both face same side as shown.

## Step \#5A:

Using Phillips screwdriver, remove clip screws on C-400 Hanger Bodies, previously installed in track, to remove C-400 Hanger Stud as shown.

## Step \#5B:

Assemble C-400 Top Plate assemblies as shown, 2 assemblies required.

## Step \#6:

Place assemblies from step \#5 on top edge of door with hanger bolt placed into clearance hole. Mark screw hole locations and pre-drill $\varnothing 1 / 8$ in [ 3.2 mm ] holes at least $11 / 2$ in [ 38.1 mm ] deep. Secure with (4 per hanger) \#10 x 1-1/4" Pan Head Screws [FT4].

Note: If doors have sufficient overlap, guide channel can be recessed into doors without cutting a full-length slot in door. If guide channel will be fully recessed, it is recommended to have at least $1 / 2$ in [ 12.7 mm ] door material at each end of door before start of guide channel slot.

## For C-538

Steps \#7 and 8:
No guide channel prep or installation required.

## For C-538-W

Step \#7:
Prepare C-914 Guide Channel Slot in bottom of doors:
1 in [ 25.4 mm ] wide in center of doors, 29/32 in [23 mm] deep and set back $1 / 2$ in [12.7 mm] from both edges of doors. It is recommended to make slot as accurate as possible for secure fit and neat appearance.

1 in [ 25.4 mm ] wide

## For C-538-B

Step \#7:
Prepare C-201 Guide Channel Slot in bottom of doors: $5 / 8$ in [ 15.9 mm ] wide in center of doors, $3 / 4$ in [19.1 mm] deep and set back $1 / 2$ in [12.7 mm] from both edges of doors. It is recommended to make slot as accurate as possible for secure fit and neat appearance.

$5 / 8$ in [ 15.9 mm ] wide

## Step \#8:

Cut C-914 aluminum guide channel to correct length as required. Drill holes in C-914 Guide Channel and pre-drill holes in doors. Locate C-914 Guide Channel in slot and secure channel into place with (4) \#8 x 3/4" Pan Head Screws [FT2].

## For C-538-W

Step \#9:
Position C-913D-138 Bypass Guide per typical installation location details and secure to floor with two (2) \#10 x 1-1/4" Pan Head Screws [FT4].

## For C-538-B

Step \#9:
Position C-200D-138 Bypass Guide per typical installation location details and secure to floor with two (2) \#10 x 1-1/4" Pan Head Screws [FT4].

## For C-538

Step \#9:
Position C-1205 Nylon Guide Set per typical installation location details and secure to floor with (3) \#8 x 3/4" Pan Head Screws [FT2].

Step \#10:
Raise door, position over guide and under C-400 Hanger Bodies in track. Lift door up and engage hanger bolt on door with slot on C-400 Hanger Bodies. Loosely secure with clips and screws previously removed in step \#5A. Adjust door height and plumb by using height adjustment hex on hanger bolt with $3 / 8$ in wrench. Lock final height adjustment by tightening screws on clip to secure bolt and with 5/16-18 K-Lock Nuts [FT17] using $1 / 2$ in wrench.

Step \#11:
After doors have been installed, snap CDC-400 Catch/Stops into each end of track with bumpers facing towards center of track. Once snapped into track, CDC-400 Catch/Stops should be free to slide within track.

Step \#12:
Position door approximately 5-10 in [127-254 mm] away from final position at one end, shown right with left side. Push loose CDC-400 Catch/Stop against hanger and engage it with hanger, bumper should be against hanger body.

## Step \#13:

With CDC-400 Catch/Stop loose, slide door to final/desired position of door.
Note: Ensure that strike and trim thickness are taken into consideration for final/desired position of door.

## Step \#14:

Once final position is achieved, mark outside edge of CDC-400 Catch/Stop as shown right, disengage CDC-400 Catch/Stop from hanger and slide door back. Position CDC-400 Catch/Stop at mark and secure with one (1) \#10 x 2-1/4" Self-Drilling Screw [FT6] in oblong hole. Recheck door position and adjust CDC-400 Catch/Stop if necessary before securing in second hole with \#10 x 2-1/4" Self-Drilling Screw [FT6]. Note: Remove any drill fillings from inside of track as this will affect operation of sliding door system.
Step \#15:
Repeat steps \#12-14 for opposite and other CDC-400 Catch/Stops.
Note: Ensure that strike and trim thickness are taken into consideration for where door will be in final position.

## Optional C-519 Fascia Installation

## Step \#F1:

Cut C-519 Fascia to correct length as required. Typically, fascia is same length as track previously installed.

## Step \#F2:

Lift fascia up to track and snap on as shown.
Note: If fascia is loose and a tighter fit is desired, use a rubber mallet on inside leg of fascia to reduce gap at +/-24 in [610 mm] intervals.

## Top Plate Template
