## C-418

## Installation Instructions

- Top mount hanger with 1/2 in [12.7 mm] adjustment range
- Precision ground ball bearings with nylon wheels
- Cycle tested up to 150,000 times
- Side mount track
- For up to 125 lbs. [57 kg] doors
- Optional snap-on fascia (C-519) and end caps (C-420)

## Parts List

C-412 Side Mount Track x length (1) Length = 2 x door width, example: 36 in [914 mm] door = 72 in [1829 mm] track

#10 x 1-1/4" Pan Head Screws (8)

C-400 Hanger Bodies (2) c/w wheels and stud

Catch/Stops (2)

#10-24 x 1-3/4"
Machine Screws (4)
[FT46]

#10-24 Acorn Nuts (4)

Complete C-418-W kit illustrated.
Cut-outs in track to expose components.

## **Optional Add-on Products**

Complete C-418F-W kit illustrated. Cut-outs in track to expose components.

C-519 Snap-on Fascia x length (1)
Length = same as track length, example:
72 in [1829 mm] track = 72 in [1829 mm] fascia

C-420 End Caps (2 Left and right

#4 x 5/16" Flat Head Screws (6) [FT29]

## **Product Details and Dimensions**

## Typical installation location for floor guides

# **Installation Steps**

#### Step #1:

Determine door size, header height, track position, and bottom clearance based on kit code ordered by using dimensions shown in detail views on previous page.

#### Step #2:

Note: If access to ends of track is not available, step #3 must be completed before step #2. Cut C-412 aluminum track to size if required, typically 2 x door width. Drill clearance holes through mounting flange of track at appropriate intervals.

Note: Use a minimum of  $\emptyset$ 5/16 in [8 mm] lag or structural bolts, spaced 12–16 in [300–400 mm] on center. Proper structural support is required. Always consult a structural engineer to confirm that mounting surface and fasteners are suitable for load and application.

#### Step #3:

Slide two (2) C-400 Hanger Bodies with wheels into track.

Note: Ensure "kncrowder.com" text on hanger bodies both face same side.

#### Step #4:

Locate center of clearance hole/top plate on top of door and drill a  $\emptyset$ 1/2 in [12.7 mm] clearance hole at least 2 in [50.8 mm] deep.

#### Step #5A:

Using Phillips screwdriver, remove clip screws on C-400 Hanger Bodies, previously installed in track, to remove C-400 Hanger Stud.

#### Step #5B:

Assemble C-400 Top Plate assemblies, two (2) assemblies required.

#### Step #6:

Place assemblies from **step #5** on top edge of door with hanger bolt placed into clearance hole. Mark screw hole locations and pre-drill Ø1/8 in [3.2 mm] holes at least 1 1/2 in [38.1 mm] deep. Secure with four (4) #10 x 1-1/4" Pan Head Screws [FT4] per hanger.

KNCROWDER.COM 1–866–999–1562

Note: If door has sufficient overlap, guide channel can be recessed into door without cutting a full-length slot in door. If guide channel will be fully recessed, it is recommended to have at least 1/2 in [12.7 mm] door material at each end of door before start of quide channel slot.

## Top of door Bottom of door Suggested minimum 1/2 in [12.7 mm] setback required both ends

## For C-418 Steps #7 and 8:

No guide channel prep or installation required.

### For C-418-W

#### Step #7:

Prepare C-914 Guide Channel Slot in bottom of door:

1 in [25.4 mm] wide in center of door, 29/32 in [23 mm] deep and set back 1/2 in [12.7 mm] from both edges of door. Make slot as accurate as possible for secure fit and neat appearance.

### For C-418-B

#### Step #7:

Prepare C-201 Guide Channel Slot in bottom of door:

5/8 in [15.9 mm] wide in center of door, 3/4 in [19.1 mm] deep and set back 1/2 in [12.7 mm] from both edges of door. Make slot as accurate as possible for secure fit and neat appearance.

#### 5/8 in [15.9 mm] wide

#### Step #8:

Cut C-914 aluminum guide channel to length of slot routed in step #7. Drill holes in C-914 Guide Channel and pre-drill holes in door. Locate C-914 Guide Channel in slot and secure channel into place with four (4) #8 x 3/4" Pan Head Screws [FT2].

#### Step #8:

Cut C-201 aluminum guide channel to length of slot routed in step #7. Drill holes in C-201 Guide Channel and pre-drill holes in door. Locate C-201 Guide Channel in slot and secure channel into place with four (4) #8 x 3/4" Pan Head Screws [FT2].

## For C-418-W

### Step #9:

Position C-913 Guide per typical installation location details and secure to floor with two (2) #10 x 1-1/2" Flat Head Screws [FT7].

## For C-418-B

Position C-200 Guide per typical installation location details and secure to floor with two (2) #8 x 3/4" Pan Head Screws [FT2].

## For C-418

#### Step #9:

Position C-1203 Nylon Guide Set per typical installation location details and secure to floor with four (4) #8 x 3/4" Pan Head Screws [FT2].

KNCROWDER.COM 1-866-999-1562

#### Step #10:

Raise door, position over guide and under C-400 Hanger Bodies in track. Lift door up and engage hanger bolt on door with slot on C-400 Hanger Bodies. Loosely secure with clips and screws previously removed in step #5A. Adjust door height and plumb by using height adjustment hex on hanger bolt with 3/8 in wrench. Lock final height adjustment by tightening screws on clip to secure bolt and with 5/16-18 K-Lock Nuts [FT17] using 1/2 in wrench.

#### Step #11:

After door has been installed, snap CDC-418 Catch/Stops into each end of track with bumpers facing towards center of track. Once snapped into track, CDC-418 Catch/Stops should be free to slide within track.

#### Step #12:

Position door approximately 5-10 in [127-254 mm] away from final position at one end, shown right with left side. Push loose CDC-418 Catch/Stop against hanger and engage it with hanger. Bumper should be against hanger body.

#### Step #13:

With CDC-418 Catch/Stop loose, slide door to final/desired position.

Note: Ensure that strike and any finishing trim thicknesses are taken into consideration for final/desired position of door.

#### Step #14:

Once final position is achieved, mark outside edge of CDC-418 Catch/Stop as shown right, disengage CDC-418 Catch/Stop from hanger and slide door back. Position CDC-418 Catch/Stop at mark and pre-drill Ø3/16 in hole in oblong hole and secure with one

(1) #10 x 1-3/4" Machine Screw [FT46] and one (1)

10-24 Acorn Nut [FT42]. Recheck door position and adjust CDC-418 Catch/Stop if necessary before securing by pre-drilling and

with machine screw and acorn nut in second hole. Note: Remove any drill fillings from inside of track as this will affect operation of

sliding door system.

#### Step #15:

Repeat steps #12 - 14 for opposite CDC-418 Catch/Stop.

Note: Ensure that strike and any finishing trim thicknesses are taken into consideration for final/desired position of door.

1-866-999-1562

# Optional C-519 Fascia Installation

#### Step #F1:

Cut C-519 Fascia to match track length.

Lift fascia up to track. Snap it into place as shown.

Note: If fascia is loose, use a rubber mallet on inside leg at 24 in [610 mm] intervals to tighten fit.

# Optional C-420 End Cap Installation

Install C-420 End Cap as shown to the right with the supplied #4 x 5/16" Flat Head Screws [FT29], three (3) screws per end cap provided.

Note: Do not install with impact driver.
